REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Hayashi, Figure 1, discloses an electrically programmable and erasable memory device formed along a silicon pillar. The top of the silicon pillar, where the drain is formed, is within the scope of being the top of a trench formed into the surface of the substrate. Hayashi, Figure 1, further discloses first and second spaced-apart regions formed in the substrate, the first region embodied as a drain region formed at the top of the pillar, and the second region embodied as a source region formed at the bottom of the trench. A channel region is formed therebetween, and includes a first portion extending along the sidewall, and a second portion extending along the substrate, at the bottom of the trench. Hayashi, Figure 1 also discloses an electrically conductive control gate disposed in the trench, and Fowler-Nordheim tunneling used for erasure.

Hayashi, Figure 1, discloses an electrically conductive floating gate disposed over and insulated from a portion of the channel region, but Hayashi does not disclose the floating gate disposed over the first region, which is the drain region at the top of the pillar. The floating gate of Hayashi extends only along the sidewall of the trench.

An updated prior art search was performed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott R. Wilson whose telephone number is 571-272-1925. The examiner can normally be reached on M-F 8:30 - 4:30 Eastern.
